PRIMROSES

The *Redwoods* Garden

DORA M. BROETJE

Route 17, Box 1376, Milwaukie, Oregon

PRIMROSE POLYANTHUS

No garden is complete without clumps of long blooming, bright colored Polyanthus. A garden favorite in grandmother's day.

	Each
Choice giant red shade50
Choice giant white shade50
Choice giant flame shade50
Choice giant yellow shade50
Coppery gold50

Other good plants in great variety of colors at 35 cents each.

Seeds of choice Giant Polyanthus in mixed colors at \$1.00 per packet.

PRIMULA AURICULA—The Auriculas bloom later than the Polyanthus, prefer a well drained soil, lime and some shade. Are lovely in shades of "off white", yellow, tan, brown, lilac, reds and bluish tones. Their sweet fragrance is a delight in your spring garden.....Plants 35c and 50c

JULIAE HYBRIDS

A smaller but one of the most charming Primrose species originating in the Caucasus Mountains. Very hardy and multiplies rapidly. Fine for edging and mass planting in front of shrubs.

HELENAE—Rich burgundy red. Flowers with a golden eye. 3 inches..... .50

PRIMROSE LODGE—Large fine heads of rich crimson flowers on 4-in. stems. Blooms over a long period..... .50

1946 CROP PRIMROSE SEED

Taken from choice selected plants with blooms of large size, line color and texture.

WHITE—Very choice, large blooms on long, sturdy stems.

YELLOW—From our best large clear yellows with orange eye.

PASTEL SHADES—Soft rose, lilac and soft tan shades.

FLAME—Taken from a group of unusual flame shades. Really very choice.

LONG STEMMED RED—Long sturdy stems and good, clear color.

MIXED COLORS—A mixture of all the colors we have. No blues.

FINE GARDEN AURICULAS—In blue shades, red shades and mixed.

All our seeds are priced at \$1.00 per package. Seperate colors 150 seds, mixed contain 250 to 300 seeds.

Each spring we go through our garden, choosing the best plants with choisest blooms for our seed stock. That is one of our joys in raising primroses. These are kept for us to enjoy and save our seed from.

THE TROPIC BIRD

THE TROPIC BIRD is a small, slender, and graceful bird, with a long, thin bill, and a tail that is deeply forked. It is found in the tropics of all the world, and is one of the most common of the group.

It is a very common bird in the tropics, and is found in all the islands of the Pacific, Indian, and Atlantic Oceans. It is also found in the tropics of Africa, Asia, and Australia.
